## Introduction

The 2011 Census was held on Sunday 27th March 2011. The Census is a national household survey that occurs every ten years. It is the most complete source of information about the population available, as it aims to include every household in the country. The same core questions are asked everywhere, making it easy to compare different areas from a national level down to a local neighbourhood level.

The Census describes the social and economic characteristics of the resident population as well as providing a wealth of household information. Central government, local authorities and their partners and a wide range of other organisations use Census information for research and planning purposes.

The Cheshire East Ward Atlas can be used to compare 2011 Census results at a ward level across the Borough. This in turn can be useful to inform decision making, resource allocation, and the planning of services for the future.

## Using the Ward Atlas

The Ward Atlas is comprised of a range of results from the 2011 Census Key Statistics and Quick Statistics Tables released by the Office for National Statistics (ONS). It presents a snapshot of life on Census Day in the 52 wards that make up Cheshire East and covers a range of statistics in the following topics:

- Population
- Ethnicity, identity and language
- Health
- Housing and accommodation
- Qualifications
- Labour market
- Travel to work

For each statistic a table is presented which ranks the 52 electoral wards in Cheshire East relative to each other as well as presenting a comparison to the equivalent Borough, regional and national figures.

Each statistic is also mapped to show its spatial pattern of distribution or concentration at ward area level within the Borough. For each map the ward percentages are divided into five equal ranges (quintiles). The highest quintile is given the darkest shade whereas the lowest quintile is given the lightest shade. The bases for the ward percentages are shown in the accompanying tables.

A Glossary at the end of the Atlas provides a detailed list of definitions and terms used in the 2011 Census.

## 2011 Census products

The Local Authorities in Cheshire and Warrington have worked together on a suite of products to help inform people of the main results from the 2011 Census.

This Ward Atlas is one report in this suite of products. The full range of products includes (for each of the Local Authorities):

### 2011 Census Ward Atlas

A report with tables and maps that compares the 2011 Census results at a ward level across the Borough.

### 2011 Census Profiles

Short summary headline results (in the form of tables and charts) for a range of geographical areas. For each area there are six profiles:

- People and population
- Economy
- Environment
- Housing
- Health and wellbeing
- Overview

These profiles are currently available for the following areas in Cheshire East:

- Local Authority
- Clinical Commissioning Groups
- Local Area Partnerships (LAPs)
- Wards

The profiles include comparator data for the North West and England and Wales or the Local Authority (for small geographies).

## 2011 Census Spotlight Reports

These reports will focus on pulling out the key messages from the 2011 Census on key themes of interest within the Local Authority and delve beyond the key findings on each theme by examining relationships between Census variables. For example an 'Older People's Spotlight Report' will include findings on lone pensioner households where the householder is in poor health. These reports are currently being scoped and are expected to be available later this year (2014).

The 2011 Census products and more information on the 2011 Census are available at [www.cheshireeast.gov.uk/randc](http://www.cheshireeast.gov.uk/randc).

## 2011 Census tables

The Office for National Statistics (ONS) will release around 500 different tables of results for the 2011 Census. The majority of these tables will be published down to output area<sup>1</sup> level. There are four main types of 2011 Census tables released by ONS. These are detailed below. This report mainly uses Key Statistics tables.

### Key Statistics

Key Statistics tables provide summary figures that cover the full range of results from the Census. They include both numbers and percentages.

### Quick Statistics

Quick Statistics tables contain statistics which refer to one variable and its response categories from a Census question.

### Detailed Characteristics

These tables have a minimum population threshold (size) of 5,000 persons and 2,000 households. Similar to Local Characteristics tables, these contain two or more Census variables, such as age and sex, but provide considerably more detail than their local equivalents, as the larger population means the risk of disclosure of personal information is lower.

### Local Characteristics

These tables have a minimum population threshold (size) of 100 persons and 40 households. They provide the most detailed results possible for very small geographies (output areas) and contain two or more variables.

### Guidance note on small numbers

The Office for National Statistics (ONS) used a process called statistical disclosure control to ensure no individuals could be identified in any published 2011 Census tables. ONS swapped some Census records between different areas to protect information supplied by individuals. In practice, this means where a result is a small number, there is an uncertainty as to whether this is a true value.

---

<sup>1</sup> Small geographical areas with an average resident population of around 300.

**Table 1.1: Population density**

Rank	Ward	All usual residents	Area (Ha)	Pop'n per hectare	Rank	Ward	All usual residents	Area (Ha)	Pop'n per hectare

25	Alderley Edge	4,780	413	11.6	51	Gawsworth	3,832	9,124	0.4
26	Nantwich South and Stapeley	8,807	838	10.5	52	Wrenbury	4,541	11,105	0.4
Cheshire East					The most densely populated ward in the Borough was Leighton which had 53.2 residents per hectare.				
North West					The least densely populated wards in the Borough were Wrenbury and Gawsworth which each had 0.4 residents per hectare.				
England and Wales									

The population density of Cheshire East was 3.2 residents per hectare.

This is lower than the regional figure of 5.0 and the national figure of 3.7.

North West		7,052,177	1,461,284	20.7					
England and Wales		56,075,912	10,546,683	18.8					

17.7% of Cheshire East residents described their health as 'not good' (fair, bad or very bad). This was lower than the regional figure of 20.7% and the national figure of 18.8%.

The ward with the highest percentage of residents describing their health as 'not good' was Macclesfield HURDSFIELD (23.7%). Crewe Central and Crewe St Barnabas wards have the second and fourth highest proportion of residents describing their health as 'not good', however both these wards have the joint lowest average age of residents (31 years).

The ward with the lowest percentage of residents describing their health as 'not good' was Leighton (10.8%).

Cheshire East	370,127	64,831	17.5
North West	7,052,177	1,426,805	20.2
England and Wales	56,075,912	10,048,441	17.9

17.5% of Cheshire East residents said that their day-to-day activities were limited because of a long-term health problem or disability (including problems related to old age). This was lower than the regional figure of 20.2% and the national figure of 17.9%.

The ward with the highest percentage of residents whose day-to-day activities were limited was Sandbach Heath and East (22.4%). The ward with the lowest percentage of residents whose day-to-day activities were limited was Leighton (9.9%).

Generally, limiting long term health is related to the average age of ward residents. However, Macclesfields Hurdsfield has the second highest proportion of residents whose activities were limited (21.7%), yet has the ninth lowest average age of residents (40 years).

This included 236 residents (2.8%) who provided 50 hours or more unpaid care a week. It is not clear whether these residents were providing care for family or friends, or were acting as volunteers in nearby care homes.				
North West		7,052,177	781,972	11.1					
England and Wales		56,075,912	5,800,246	10.3					

10.8% of Cheshire East residents provided more than one hour of unpaid care per week, similar to the regional figure (11.1%) but higher than the national figure (10.3%). 2.2% (8,024) of Cheshire East residents provided 50 hours or more unpaid care a week. This was similar to regional (2.8%) and national (2.4%) figures.

The ward with the lowest percentage of residents who provided unpaid care was Crewe Central (7.1%).

The ward with the highest percentage of residents who provided unpaid care was Odd Rode (13.7%). This included 236 residents (2.8%) who provided 50 hours or more unpaid care a week. It is not clear whether these residents were providing care for family or friends, or were acting as volunteers in nearby care homes.

The ward with the lowest percentage of residents who provided unpaid care was Crewe Central (7.1%).

## Glossary

This glossary explains terms used in the 2011 Census by the Office for National Statistics (ONS). ONS is responsible for the Census in England and Wales. Technical information on relevant terms can be found in the 2011: Definitions available at [www.ons.gov.uk/ons/guide-method/census/](http://www.ons.gov.uk/ons/guide-method/census/).

### Accommodation type

The type of accommodation used or available to use by an individual household. It includes:

- Detached
- Semi-detached
- Terraced (includes end of terrace)
- Flat, maisonette or apartment includes those in purpose built blocks, part of a converted or shared house (including bedsits) and in commercial buildings
- Caravan or other mobile or temporary structure

### Ethnic Group

Ethnic group classifies people according to their own perceived ethnic group and cultural background.

- **Black and minority ethnic groups (BME)** includes all groups apart from white English/Scottish/Welsh/Northern Irish. So it includes white Irish, white gypsies and travellers and other white groups
- **Country of Birth (Non-UK)** includes anyone not born in England, Northern Ireland, Scotland or Wales.

### General health

General health is a self-assessment of a person's general state of health. People were asked to assess whether their health was very good, good, fair, bad or very bad. This assessment is not based on a person's health over any specified period of time.

- **Not good health** is defined as those who assessed their health as fair, bad or very bad. As these options are different to the 2001 Census options, the results cannot be directly compared.

### Household

A household is defined as:

- one person living alone, or
- a group of people (not necessarily related) living at the same address who share cooking facilities and share a living room or sitting room or dining area.

This includes:

- sheltered accommodation units in an establishment where 50 per cent or more have their own kitchens (irrespective of whether there are other communal facilities)
- all people living in caravans on any type of site that is their usual residence. This will include anyone who has no other usual residence elsewhere in the UK.

A household must contain at least one person whose place of usual residence is at the address. A group of short-term residents living together is not classified as a household, and neither is a group of people at an address where only visitors are staying.

It does not include residents in a communal establishment.

### Household resident

A household resident is a person whose place of usual residence is in an individual household, and not within managed residential accommodation in a communal establishment.

### Household size

The size of a household is equal to the number of usual residents in the household. Visitors staying at an address do not contribute to that household's size because they are counted in the household of their place of usual residence. Household size is only applicable to occupied household spaces.

- **Average (mean) household size** is the number of people living in households divided by the number of occupied household spaces.

### **Household space**

A household space is the accommodation occupied by an individual household or, if unoccupied, available for an individual household. The number of occupied household spaces in an area is the same as the number of households.

### **Households with dependent children**

A dependent child is a person aged 0 – 15 in a household (whether or not in a family) or aged 16 – 18 in full-time education and living in a family with his or her parent(s). It does not include any children who have a spouse, partner or child living in the household.

### **Households without cars or vans**

Households that do not own, or have access to, cars or vans for private use.

### **Language**

Proficiency in English language classifies people whose main language is not English (or not English or Welsh in Wales) according to their ability to speak English. A person is classified in one of the categories:

- can speak English very well
- can speak English well
- cannot speak English well
- cannot speak English at all

Residents aged 3 or more where English is not their main language and who cannot speak English well or at all are shown in this Atlas.

### **Lone parent family**

A lone parent family consists of a father or mother with his or her child(ren) where the parent does not have a spouse, same-sex civil partner or partner in the household and the child(ren) do not have a spouse, same-sex civil partner or child in the household. A lone grandparent with his or

her grandchild(ren) are also considered a lone parent family if there are no children in the intervening generation present in the household (note that children of the grandparent may also be present if they are not parents or grandparents of the youngest generation).

### **Lone parent household**

A household that comprises a lone parent family and no other person.

### **Lone pensioner households**

A one person household where the person is aged 65 years or older.

### **Long-term health problem or disability**

A long-term health problem or disability that **limits a person's day-to-day activities**, and has lasted, or is expected to last, at least 12 months. This includes problems that are related to old age. People were asked to assess whether their daily activities were limited a lot or a little by such a health problem, or whether their daily activities were not limited at all. People whose daily activities were limited in any way were included in this Atlas.

### **No qualifications**

Those aged 16 or over who have no academic or professional qualifications. In 2001 this was reported for those aged 16-74 and so the results are not directly comparable.

### **Population density**

Population density is the number of usual residents per hectare. A hectare is the metric unit of area defined as 10,000 square metres or approximately 2.47 acres.

### **Unemployed**

A person aged 16 to 74 is classified as unemployed if they are not in employment, are available to start work in the next two weeks, and either looked for work in the last four weeks or are waiting to start a new job.

A person is defined as **long-term unemployed** at the time of the 2011 Census if they were unemployed and the year they last worked was 2009 or earlier. So they had been unemployed for at least 15 months.

### **Owner occupied**

Includes property owned outright or with a mortgage or loan. It does not include shared ownership (i.e. part owned, part rented property.)

### **Travel to work**

The method of travel used for the longest part, by distance, of the usual journey to work. This topic is only applicable to people who were in employment in the week before the Census (this includes those who work mainly at or from home).

- By car or van includes drivers or passengers but excludes taxis
- Public transport includes train, bus, minibus, coach, underground, metro, light rail and tram. It excludes taxis.

This Ward Atlas uses table QS701EW to report travel to work results from the 2011 Census. These results are not directly comparable with 2001 Census results (as the 2001 Census tables excluded people who worked from home in the base for percentages). There is another 2011 Census table, CT0015EW that allows comparison with the 2001 Census results, but it only goes down to local authority level.

### **Unpaid care provider**

A person is a provider of unpaid care if they look after or give help or support to family members, friends, neighbours or others because of long-term physical or mental ill health or disability, or problems related to old age. This does not include any activities as part of paid employment.

No distinction is made about whether any care that a person provides is within their own household or outside of the household, so no explicit link can be made about whether the care provided is for a person within the household who has poor general health or a long-term health problem or disability.

### **Usual resident**

The main population base for outputs from the 2011 Census is the usual resident population as at Census day 27 March 2011. Although the population base for enumeration included non-UK short-term residents, this population is analysed separately and is not included in the main

outputs from the 2011 Census. All outputs, unless specified, are produced using only usual residents of the UK.

For 2011 Census purposes, a usual resident of the UK is anyone who, on Census day, was in the UK and had stayed or intended to stay in the UK for a period of 12 months or more, or had a permanent UK address and was outside the UK and intended to be outside the UK for less than 12 months.

Please note that, following ONS' approach, comparisons with 2001 population are with the 2001 mid-year estimates rather than the 2001 Census results.
